Office Action Summary

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-17, drawn to a peeling sheet and accompanying peeling member, classified in Class 428, subclass 354.

II. Claim 18, drawn to a fixing apparatus, classified in Class +++, subclass +++.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions relate to a laminated sheet having an outer adhesive layer, and an apparatus comprising various rollers together with an accompanying peeling member that is clearly not related in any direct manner to the claims of Group I.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Art Unit 1771

5. A telephone call was made to James Costigan on November 12, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
